SUMMARY

Mobile Developer and Information Systems student specializing in Flutter and Dart, with hands-on experience building production applications using Clean Architecture and Cubit (BLoC) state management. Completed a 5-month internship as a Flutter Mobile Developer at PT Neural Technologies Indonesia, contributing to an internal enterprise application within a Melos-managed monorepo. Proficient in REST API integration with Dio, dependency injection via Service Locator, localization with Slang, cloud data storage with Firebase Firestore, and local persistence with Hive. Also holds a foundation in native Android development (Kotlin, MVVM) from Bangkit Academy, supported by Google, GoTo, and Traveloka. Certified in Android development, machine learning, and programming fundamentals through Dicoding Indonesia. Seeking an internship or entry-level role to contribute to impactful Flutter mobile development projects.

EDUCATION

Universitas Negeri Surabaya 2022 – Present
Bachelor's Degree in Information Systems | GPA: 3.85 / 4.00

EXPERIENCE

Mobile Development Cohort, Bangkit Academy Sep 2024 – Present

- Acquired advanced skills in Android app development using Kotlin, adhering to industry standards such as Material Design 3 and implementing modern architectural patterns like MVVM for scalable and maintainable applications.
- Collaborated with teams from Machine Learning and Cloud Computing tracks to integrate AI/ML features and cloud solutions into Android applications, fostering a multi-disciplinary approach to app development.
- Currently leading the development of an innovative Android application for skin disease detection. Leveraging camera integration for real-time image analysis, RESTful APIs for backend communication, and DataStore for efficient user data management, the app aims to provide accurate and accessible healthcare solutions.

Mobile Developer Intern (Flutter), PT Neural Technologies Indonesia Feb 2025 – Jun 2025

- Contributed to the development of an internal enterprise application for the company using Flutter, working within a Melos-managed monorepo codebase.
- Implemented UI layouts based on design specifications and integrated RESTful APIs using Dio for data fetching.
- Applied Clean Architecture principles and Cubit (BLoC) for state management to build maintainable, scalable features.

COURSE & CERTIFICATION

- **Intermediate Android App Development,** Dicoding Indonesia, *December 2024*
- **Machine Learning Implementation for Android,** Dicoding Indonesia, *November 2024*
- **Basics of AI,** Dicoding Indonesia, *October 2024*
- **Android Application Fundamentals,** Dicoding Indonesia, *October 2024*
- **Basic Android Application Development,** Dicoding Indonesia. *October 2024*
- **Programming Basics to Become a Software Developer,** Dicoding Indonesia, *September 2024*
- **Learn Git Basics with Github,** Dicoding Indonesia, *September 2024*
- **Kotlin Programming Introduction,** Dicoding Indonesia, *September 2024*
- **Programing Logics Introduction,** Dicoding Indonesia, *September 2024*

SKILLS

- **Language:** Bahasa Indonesia (Native), English (Intermediate)
- **Flutter:** Flutter, Dart, Clean Architecture, BLoC/Cubit, Dio (REST API integration), Service Locator (Dependency Injection), Slang (Localization), Firebase Firestore, Hive (Local Storage), Melos (Monorepo)
- **Native Android:** Kotlin, Java, Git, RESTful APIs, Android App Development, Material Design, MVVM Architecture, Agile Development, Machine Learning Model Integration in Android App, Cloud Solution Integration
- **Others:** User Data Management, Communication, Teamwork
